## FULL STACK SOFTWARE ENGINEER

---

Full stack software engineer with enthusiasm for building exquisite applications. Experienced in Javascript Front-End based programming and Ruby Back-End database development. 10+ years of experience working for both a large corporation and small family business. Self motivated and consistently exceeding expectations. Passionate about surfing, snowboarding, ice hockey, sponsored for ice hockey for 4+ years. Leadership roles include hockey captain, supervisor, manager and promotions from entry level. Ability to listen to direct reports and talk with employees in such a way that jobs get performed and completed in a set period of time. Strong understanding of the difference between large and small companies values which allows me to be able to adapt to and share the same common goal of the company.
